

**Bamcentric Software *WISEGRC's Event Processing and Analytics for GRC*
Solution Certified to Run on SAP HANA® Cloud Platform**

**Running on SAP HANA Cloud Platform, solution delivers online real-time alerts on exceptions
in business rules for customers using SAP® ERP**

São Paulo – January 25, 2017 – Bamcentric Software Solutions today announced its WISEGRC Event Processing and Analytics for GRC solution version 1.0 has achieved SAP certification as an on-premise extension running on SAP HANA® Cloud Platform. The solution has been proven to integrate with the SAP® ERP application, providing online real-time alerts on exceptions in business rules.

The SAP Integration and Certification Center (ICC) has certified that WISEGRC Event Processing and Analytics for GRC achieved the technical and syntactical consistency of SAP HANA Cloud Platform in accordance with SAP certification procedures.

The solution was developed in consortium with Sytech and in cooperation with SAP Co-Innovation Lab, which granted to Bamcentric and Sytech immediate access to SAP's newest technologies,

“We are delighted to announce the successful achievement our *WISEGRC solution*, now certified to run on SAP HANA Cloud Platform,” said Robson Souza, CEO at Bamcentric. “This certification expands the ability of WISEGRC by increasing operational transparency and improving the interaction between people and processes. The real-time alerts it generates broaden the capacity of measurement of indicators and will prove highly beneficial to our current and future customers.”

As a result of the certified integration, *WISEGRC* now provides simple, safe and scalable online real-time alerts on exceptions in business rules to customers using SAP ERP through its ability to run on SAP HANA Cloud Platform.

About Bamcentric / Sytech

Bamcentric software, coupled with Sytech's consulting experience in SAP software environments, generated the WISEGRC solution, which enables better trend analysis and more predictable performance for business management, expanding the point-to-point capacity of the most important operations through real-time alerts on exceptions in business rules, allowing the measurement of the efficiency of supply chains, manufacturing processes, marketing campaigns, sales, financials, parameters and business processes.
